

Ty McNutt, Ph.D. Director of Business Development, Wolfspeed

Dr. Ty McNutt currently serves as Director of Business Development for the Fayetteville, Arkansas location of Wolfspeed, a Cree Company. He manages various technical projects, and works closely with customers and their applications teams to integrate advanced silicon carbide device and packaging technologies into next generation systems. He is an inventor on seven issued patents on silicon carbide materials, devices, packaging, and applications, as well as authored or co-authored over 70 publications on wide bandgap devices. Dr. McNutt has been working in the field of silicon carbide for 17 years and received his Ph.D. in Electrical Engineering from the University of Arkansas in the field of silicon carbide semiconductor device physics.
